- Non-Slip Safety Treads on Each Step
- Portable and Removable
- Built to Specifications of Your Pool
- Titanium Dioxide Protected
- Weather Inhibitors for Outdoor Use
- Impact Modifiers for Strength
- Full One-Year Warranty on All Parts
- Available in 4, 5 or 6 Step Models

The AquaTrek Ladder lets you walk into your pool. People of all ages can enter and exit your pool with ease by simply walking forward. Wide treads and handrails provide the required stability. The AquaTrek Ladder is easily removed for automatic pool cleaners, retractable pool covers and solar blankets.

---

“We love it! It’s a great product and we drag it in and out of the pool a lot on a daily basis.”

— Phyllis Hudson  
Glens Falls YMCA

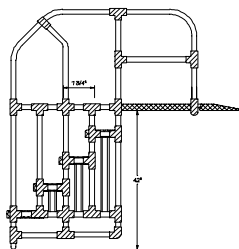

---

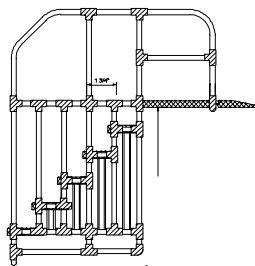

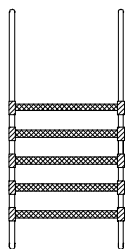

*Walk forward for BOTH entry  
and exit of the pool!*

# aQuaTrek™ LADDER

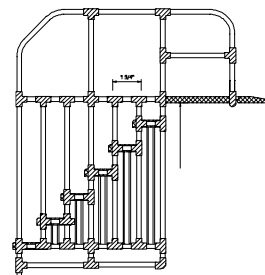

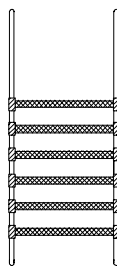

- AQ-4000 (4-TREADS)
- AQ-5000 (5-TREADS)
- AQ-5600 (6-TREADS)

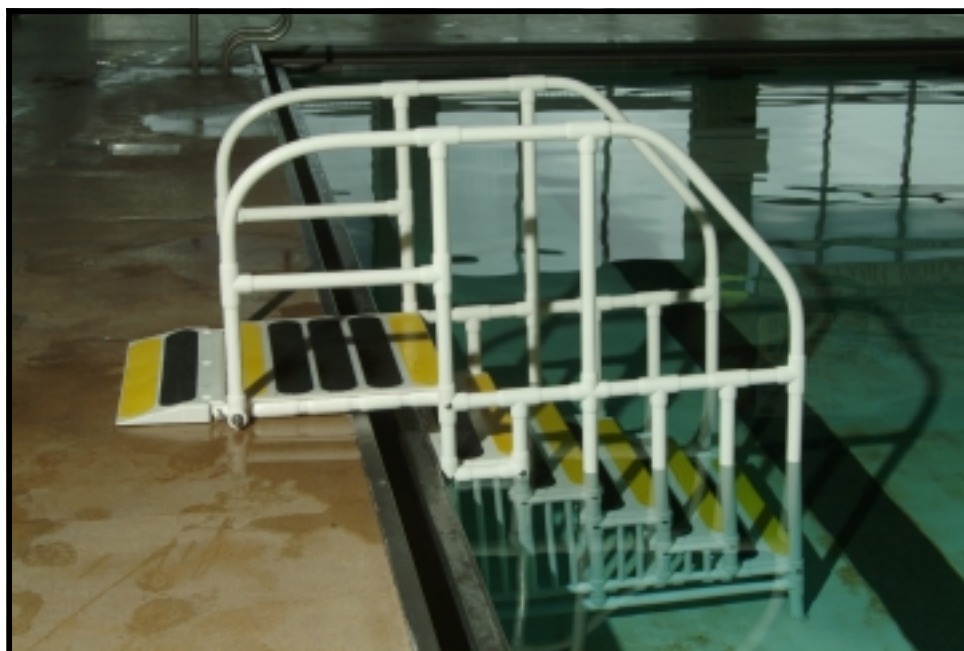

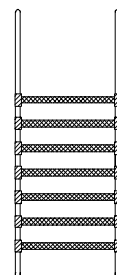

*The AQ-4000  
4-Tread Ladder*

*The AQ-5000  
5-Tread Ladder*

*The AQ-5600  
6-Tread Ladder*

*AquaTrek Ladder models vary depending on pool depth and desired riser height.*

*All products are customized to your pool deck and gutter system.*

“It (AQ-5600 AquaTrek Ladder) permits people to get into our pool without using the lift chair. This makes it a confidence builder to people who are otherwise losing mobility.”

— Jamie Endresu  
Mon Valley YMCA

**Q. How do you know which model of Ladder to choose?**

**A.** Choose your AquaTrek Ladder based on its riser height, or distance between steps. The riser height is determined by the depth of your pool from pool floor to the deck surface. A really deep pool will need a ladder with more steps than a shallow pool. An example would be an AQ-5000 AquaTrek 5-Treaded Ladder going into a pool 44-inches deep will have a smaller riser height than an AQ-5000 going into a pool 50-inches deep. The 44-inch deep pool unit would have approximately 7-1/2 inches as its riser height, whereas the 50-inch deep pool would have an AQ-5000 with an approximate riser height of 8-1/2 inches.

**Q. What is considered a therapeutic riser height?**

**A.** Anywhere from 5-1/2 to 7 inches is what would be considered the best, most comfortable steps for someone who has a disability. Just as a visual reference, 5-1/2 inches is about the height of a soda pop can.
